

Heavy-Duty Versatile Aggressive Design Profitable

WB1500 TX

Professional Series

Designed for the landscape and construction industry professional, Ramrod Equipment's new WB1500 TX Model Loader has all the power and versatility of our toughest ride-on Mini-Skid Loaders, in the more compact body of a walk-behind machine. The WB1500 TX's solid construction, superior performance and extensive selection of attachments makes it the ideal machine for performing heavy-duty jobs in areas larger skid steers can't access.

Featuring

Unmatched Hydraulic Power with Variable Power Control. Ramrod features a powerful 11 g.p.m. of hydraulic flow to the auxiliary circuit providing unmatched power to a wide range of hydraulic attachments. Plus, the Variable Power Control enables you to direct power where you need it, when you need it.

Total Maneuverability. With an overall width of 31 inches, the compact Ramrod WB1500 TX can easily access tight work areas larger skid steers are incapable of reaching. Plus, these units also feature a zero radius turning capacity for even greater maneuverability.

Superior Lift Capacity. Featuring a lift capacity of up to 1500 lbs to a height of 66" at the pivot pin, the WB1500 TX easily out-lifts its competitors.

Heavy-Duty Self Leveling Loader Arms. Increases productivity by preventing the loss of load during transport and ensures greater control over your load - even when transporting loose materials with a bucket or moving pallets of sensitive materials, etc. Exclusive to all Ramrod Mini-Skid Loaders!

Unique Track Design. Operate your Ramrod 12 months a year in the most difficult job site conditions. Our unique track design allows the units to easily maneuver in dirt, mud, and snow, and on concrete or grass. You can power your Ramrod through the toughest conditions and still be light on the turf.

High Underframe Clearance. This allows the unit to work on a variety of terrains without getting hung up in low or soft areas.

Quick Attach Accessory Bracket. Attachments can be mounted and dismantled in mere seconds, enabling you to move from job to job in minimum time.

Full Accessibility and Serviceability. An easy to access top pane provides complete accessibility to all your Ramrod components. Change oil, adjust hydraulic levels, and replace filters, etc. in just minutes!

Simple Operator Interface. Featuring easy-to-operate joystick controls. Tachometer/hourmeter is optional.

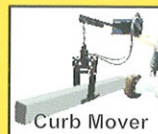

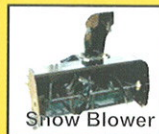

Different Engines to Choose From, Including Kawasaki 23 H.P. Air Cooled Engine. Covered by a comprehensive two year warranty with worldwide service and support.

Specifications

WB1500 TX

Weight	1600 lbs
Lift Capacity to full height	1500 lbs
Tractive effort (push-pull force)	1200 lbs
Lift height to pivot pin	66"
Lift height to bottom of flat bucket	60 1/4"
Overall height in fully raised position	75"
Overall height in lowered position	45 1/2"
Reach at full height	21"
Clearance dumped	43 1/2"
Overall width	31"
Overall length with bucket	83 1/2"
Overall length without attachment	54"
Under frame clearance	5"
Rollback, fully raised	30 degrees
Rollback at ground	40 degrees
Dump, fully raised	70 degrees
Dump at ground level	35 degrees

With more than 60 available attachments to choose from, the versatile WB1500 TX can take on any job, anytime, anywhere!
